MEMORANDUM FOR: Chief, Metropolitan Facilities Group, OC-DND

FROM: [REDACTED]

Chief, Domestic Networks Division, OC

SUBJECT: Television Distribution Within the Current  
Headquarters Facility [REDACTED]

1. On Thursday, 27 September, [REDACTED] and I attended a meeting of a working group chaired by [REDACTED] of OCR and including membership by FBIS and DO on the subject of television service in the Headquarters facility. We were invited to this meeting in response to my request to the Director of OCR to identify their plans for future non-secure television installations in Headquarters. [REDACTED]

2. As a result of the discussion, it appears that there may be conservatively three to four hundred television sets installed in the next couple of years in Headquarters. [REDACTED]

[REDACTED]

3. It became apparent through the discussion that the location of the television sets under discussion might vary from time to time and that the actual number seemed difficult to bound on the upper end. We requested this working group as chaired by OCR to write down the currently perceived requirements for television distribution within the Headquarters facility including classified broadcasts and such imagery and graphics as were discussed at the meeting. [REDACTED] promised he would do this and we agree that he would send it to the Office of Communications. OC will examine the COMSEC and ISSG implications of the classified broadcast and will seek ways of protecting such information in a commercial TV environment. [REDACTED]

CONFIDENTIAL

SUBJECT: Television Distribution Within the Current  
Headquarters Facility [ ]

4. The Office of Communications (MFG) will determine the status of the SAFE communications bus and will outline the work that needs to be done to make this available for carrying this commercial television broadcast function. [ ]

5. I was advised by [ ] of the SAFE Project Office that at the time of the SAFE redirection, this material was inventoried with OC and that all materials, drawings and information was turned over to the Office of Communications. I have subsequently been unable to find anyone in the Office of Communications who can identify with this activity. I would suggest that you contact [ ] if you are unable to locate the information and material within the Agency and that we might want to acquire [ ] services to verify the status of the system. I have no doubt that significant repairs would have to be made. [ ]

6. If you have difficulty making contact on this subject, please advise me. Otherwise I would like some form of determination of the status of this system by 12 October. [ ]
